## **RNase AWAY<sup>®</sup> Safely and Effectively Decontaminates Laboratory Surfaces**

San Diego, CA – July 2002 RNase AWAY from Molecular BioProducts, Inc., provides an economical solution for researchers concerned with nuclease and nucleic acid contamination. Easier and safer to use than DEPC, RNase AWAY is proven to completely remove RNase, DNase and DNA contamination from laboratory work surfaces and equipment, such as pipettors, bench tops, glass and plastic ware. RNase AWAY is ready to use right out of the bottle and leaves no residue when used as directed. Even difficult to reach surfaces can quickly and effectively be decontaminated.

RNase AWAY is available in 250ml, 1 liter and 4 liter sizes as well as in a convenient, refillable 475ml spray bottle. Technical Report #205 detailing the effectiveness of RNase AWAY is available on MBP's web site.
