### **MBP® SoftFit~L™ Pipet Tips**

Molecular BioProducts, Inc. is proud to introduce an alternative pipet tip that is fully compatible with the Rainin LTS™ LiteTouch™ pipettor. SoftFit~L pipette tips take advantage of the LiteTouch design, providing a strong seal and decreasing the ejection force necessary to remove the tip. This ergonomic benefit brings a solution to the pressure and pain of the repetitive force associated with ejecting pipet tips while reducing the risk of Cumulative Trauma Disorders, the most common laboratory related injury. Available with the ART® self-sealing barrier, Pure™ pre-sterile, and MBP non-sterile, SoftFit~L pipet tips are an economical alternative to Rainin's more expensive LTS pipet tips. MBP offers the SoftFit~L tips in 20ul, 200ul, and 1000ul volumes. SoftFit~L ART® and Pure™ pipet tips are pre-sterilized and independently certified RNase-, DNase, DNA-, and pyrogen-free.

Molecular BioProducts (MBP) is the leading manufacturer in superior quality disposable lab supplies to the life science industry and has been serving Molecular Biologists in the biotech, academic and pharmaceutical workplace around the globe for over a decade. Our extensive product line consists of the ART (Aerosol Resistant Tip), MBP Pipet Tips, PCR accessories and our broad line of BioRobotix™ brand tips for automated workstations. MBP's focus is to provide value added solutions and quality products for the liquid handling needs of the life science researcher.
