ART TIPS ARE PROVEN TO ELIMINATE CARRYOVER CONTAMINATION

SAN DIEGO, December 15, 2003, ART® (Aerosol Resistant Tip) pipet tips contain a patented barrier, are scientifically proven to eliminate carryover contamination and are suitable for PCR procedures and handling radioactive and highly infectious samples. The barrier material is non-wicking, self-sealing, hydrophobic HDPE that effectively blocks all liquid and aerosol passage.

Additionally, all tips are certified to be RNase and DNase free by independent laboratories.
